BRISTOL, TENN., Feb. 19, 1864. DEAR SIR: Do you want any FERTILIZER for Oats, Cornand Potatoes? Our "Compound" has been thor oughly tested on these crops with the most satisfactory results. Mr. J. Massengill, one of the best farmers in Sullvan County, used on oats 100 lbs, to the acre-the yield was 75 bushels to the acre. He beat us, as we got only 45 bushels to the acre, but our land was very poor. We tried it on corn last year on thin highland. We nev er saw such a rank growth of corn on highland If we could have gotten two more rains on it be-

been enormous-as it was, we made 40 bushels to the acre: As a POTATOE FERTILIZER IT can't be exceled. Take good clover land, strew it along the potatoe furrow at the rate of 200 or 300 lbs to the acre. Drop the sets, and cover up all together, and you will have larger and smoother potatoes
